

ABSTRACT OF THE DISCLOSURE

A remote control key that may easily be disassembled while preventing theft of its transponder. The remote
5 control key includes a transmitter for transmitting a signal to remotely control locking and unlocking of a door. The transponder transmits a predetermined ID code. A housing retains the transmitter and the transponder. A pad is formed on the housing to operate the transmitter. A seal seals the
10 transponder that is retained in the housing. The seal and the pad are formed from the same material.
